

SAFETY HAZARD SHEET

Section 1 Chemical Name and Company Details

Yeast One broth /RPMIA

Product code Y3462

Trek Diagnostic Systems Ltd.
Imberhorne Lane
East Grinstead
West Sussex
RH19 1QX

Tel: +44(0)1342 318777

Fax: +44(0)1342 318666

Section 2 Composition and Information on Ingredients

Aqueous solution of RPMI medium 1640, MOPS biological buffer and supplement YO supplied in 10ml volumes in borosilicate screw cap tubes.

This product does not present a health hazard within the meaning of the dangerous substances directive 67/548/EEC

Section 3 Hazards Identification

This product is not classified as hazardous and no known health hazard is known to be associated with exposure to this product.

This product is however used in conjunction with yeast cultures and any hazards associated with the cultures in use should be recognised and appropriate additional precautions or action taken.

Section 4 First Aid Measures

Eyes: wash with copious amounts of water and see a physician if symptoms persist.

Skin: wash with soap and water, consult a doctor if irritation develops.

Ingestion: not applicable under normal conditions of use but seek medical attention if Abdominal distress occurs.

Inhalation: not applicable under normal conditions of use but seek medical attention is Respiratory distress occurs.

SAFETY HAZARD SHEET

Section 5 Fire Fighting Measures

No special precautions are required in the event of fire. Use a Fire Extinguisher appropriate to local fire conditions.

Section 6 Accidental Release Measures

In general the affected area should be treated as any other non hazardous liquid spill.

If however the broth has been inoculated with a culture the spill should be considered to be bio-hazardous waste and the spill treated as such.

Section 7 Handling and Storage

Store refrigerated between 2-8°C in the original packaging

Section 8 Exposure Controls, Personal Protection

In general no personal protection is required, but for this products intended use with yeast cultures the usual precautions of a laboratory coat, safety glasses and appropriate gloves would be recommended

Additional requirements may be indicated by assessment on use of any given bacterial species
Such as masks or safety cabinets.

SAFETY HAZARD SHEET

Section 9 Physical and Chemical Properties

Straw/pink coloured liquid.

Section 10 Stability and Reactivity

Stable under normal conditions of use and storage, avoid high temperatures as this may degrade constituent organic components.

Section 11 Toxicological Information

All of the component parts are of a low order of toxicity in their pure powder forms. In solution any possible minor respiratory irritation that could be caused by non hazardous “nuisance dusts” is eliminated. The most hazardous component is MOPS biological buffer and is only considered an irritant in its unadulterated state.

Section 12 Ecological Information

No relevant studies have been identified

SAFETY HAZARD SHEET

Section 13 Disposal Considerations

Uncontaminated broth can be disposed of as non hazardous waste according to local/federal waste disposal regulations.

Broth inoculated with fungal cultures should be sterilised by autoclaving or incineration prior to disposal according to local/federal waste regulations.

Section 14 Transport Information

This is a non hazardous material no special EU or US shipping regulations/restrictions could be found that affect the shipping this product.

Section 15 Regulatory Information

Risk phrases: none

Safety phrases: none

EC classification: not classified

Section 16 Other Information

The above information is believed to be correct but does not purport to be all inclusive and should only be used as a guide. Trek diagnostic shall not be held responsible for any held responsible for any damage resulting from handling or contact with the above material
