

SAFETY DATA SHEETS

**Section 1 chemical name and company details**

**Yeast susceptibility panel with Alamar Blue**

Trek Diagnostic Systems Ltd  
Imberhorne Lane  
East Grinstead  
West Sussex  
UK

Tel: + 44(0)1342 318777

Fax: + 44(0)1342 218666

**Section 2 composition and information on ingredients**

Microtitre panel containing a range of antifungal drugs and Alamar Blue

**Section 3 hazards identification**

This product is not classified as hazardous and no known health hazard is known to be associated with exposure to this product.

This product is however used in conjunction with fungal cultures and any hazards associated with the cultures in use should be recognised and appropriate additional precautions or action taken

**Section 4 first aid measures**

**Eyes:** Wash with copious amounts of water and see a physician if symptoms persist

**Skin:** Wash with soap/water, consult a doctor if irritation develops

**Ingestion:** Not applicable under normal conditions of use but seek medical attention if abdominal distress occurs

**Inhalation:** Not applicable under normal conditions of use but seek medical attention if respiratory distress occurs

SAFETY DATA SHEETS

**Section 5 fire fighting measures**

No special precautions are required in the event of fire. Use a Fire Extinguisher appropriate to local fire conditions.

Other considerations:-

It may be possible for the plastic that comprises the panel itself to evolve toxic fumes, when dealing with a fire involving large numbers of panels self contained breathing apparatus would be recommended.

**Section 6 accidental release measures**

Solid spills are unlikely under normal conditions of use as deliberate physical removal of well contents would be required, after reconstitution however a liquid spill could happen. In this event the spill would constitute a biohazard and should be removed by absorption, disinfection and all materials autoclaved or incinerated

**Section 7 handling and storage**

Store at room temperature (15-25°C) in the original packaging.

**Section 8 exposure controls, personal protection**

In general no personal protection is required, but for this products intended use with yeast cultures the usual precautions of a laboratory coat, safety glasses and appropriate gloves would be recommended

Additional requirements may be indicated by assessment on use of any given yeast species such as masks or safety cabinets.

SAFETY DATA SHEETS

**Section 9 physical and chemical properties**

96 well microtitre tray with up to 96 dried thin film anti-fungal drugs.

**Section 10 stability and reactivity**

Stable under normal conditions of use and storage, avoid high temperatures and direct sun light as this may degrade constituent organic components.

**Section 11 toxicological information**

All the drugs present and components of the Alamar blue are classified as hazardous, with label precautions running from irritant to toxic in their unadulterated state. At the levels of use and with even these low levels locked away in a thin film in the bottom of the microtitre well it is not likely that significant exposure to an operator can occur. All other components of the media present are classified as non hazardous and as such pose no risk. (a cosh information sheet is available on request)

**Section 12 ecological information**

No relevant studies have been identified

SAFETY DATA SHEETS

**Section 13 disposal considerations**

Unused panels should be disposed of as non hazardous waste according to local/federal waste disposal regulations.

Plates inoculated with yeast cultures should be sterilised by autoclaving or incineration prior to disposal according to local/federal waste regulations.

**Section 14 transport information**

No special EU or US shipping regulations/restrictions affect the shipping of this product.

**Section 15 regulatory information**

**Risk phrases:-** none  
**Safety phrases:-** none  
**EC classification:-** not classified

**Section 16 other information**

The above information is believed to be correct but does not purport to be all inclusive and should only be used as a guide. TREK shall not be held responsible any damage resulting from handling or contact with the above material
